| 2. | | | | Regarding telephone directories and listings...the current (?) directory has not as yet been recalled, but it has been in use for about a year and, therefore, is somewhat outdated. As a result, the operators are called quite frequently for assistance. Hopefully, the new functional directory will be out later this month and the old books recalled. When this happens, we predict the number of assistance calls will increase; but, eventually as people develop their own list finders, these will go down. |

| 7. | | | | The operators, today, keep abreast of telephone changes through the automated CEMLOC system and changes are made on a daily basis. This will continue on into the future, even after the new directories come out. |
